

FOR IMMEDIATE RELEASE

**MENTISoftware, GRC software Solutions Leader,
Announces Expansion into Asia Pacific and EMEA Markets
- and the addition of new industries-**

Denver, Collaborate '08 Technology and Applications Forum, April 14, 2008— MENTISoftware (MENTIS), a Governance, Risk and Compliance (GRC) thought leader and software solutions provider for Oracle databases and applications, **today announced their expansion into the Asia Pacific region and into Europe, the Middle East, and Africa.**

MENTIS is expanding its reach in response to the global demand for imbedded GRC solutions that bring value to business groups, as well as address the needs of IT. MENTIS is excited to add the Asia Pacific and EMEA markets to the North and Central American markets that they currently serve.

"The sophistication of our GRC 6.0 solution is gaining universal appeal," said Rajesh Parthasarathy, President and CEO of MENTIS. "It appears that the global market is not only ready, but is embracing a more holistic approach to GRC, especially in the area of data security. These organizations are driven by customer demand, and a best practice approach is a major competitive differentiator in the global market place."

MENTIS is also expanding into new industries, adding to the intelligence of its data classification library. Defense, building materials and construction, power, and major holding companies have been added to a growing list of customers. For the last four years, MENTIS has worked with Fortune 50 organizations, members of the big Four Accounting Firms, and industries such as healthcare, finance and academia.

About MENTISoftware

MENTIS' comprehensive preventive and detective strategy automates compliance and security across the security architecture. The MENTIS technical engine is innovative and flexible with products that cover production and non-production databases, applications, and custom security architectures. [Masking](#), [monitoring](#), and [access control](#) products work independently or can be used as a complete [GRC solution](#). Out-of-the-box metadata, data classification and security rules allow companies to comply with changing, complex legislation within their industry, automate complex processes, and facilitate collaboration between compliance and technology groups. Using the same technical engine that powers its products, MENTIS also provides an independent state of security review, which is a quick, yet comprehensive risk and exposure assessment of an organization's database security setup. It includes a gap analysis of current state vs. industry-specific best practices and compliance requirements, and tactical and strategic recommendations to achieve and sustain best practices.

MENTIS was founded in 2004 by experts in information security, IT audit, compliance and enterprise software development. For more information, please contact 1-212-861-2235 or visit www.mentissoftware.com.
